

INVITATION

Informative Meeting: Experts for Solar Energy

Solarexpo Veronafiere, Verona

Date May 5th 2011 **Time** 10:00 - 12:30

The Chamber of Crafts for Munich and Upper Bavaria aims to increase the transfer of knowledge with its Italian partners. The Chamber of Crafts already has a broad range of qualification modules and courses on offer in particular in the field of solar energy (solar heat and photovoltaic).

AlpHouse In this multidisciplinary approach, craftsmen, architects and planners combine alpine building culture with the needs for energy efficiency.

AlpHouse has the aim to install a network for placing planners and craftsmen. These pilot enterprises take part in AlpHouse trainings with the aim of establishing a higher level of quality combining the needs of building culture and energy efficiency in an interdisciplinary approach. Due to this high quality standard a fundamental knowledge of the involved participants is necessary.

The Chamber of Craft will create a course, benefiting from the experiences of existing courses. Therefore an advanced training can be offered which is tailored to the particular needs of AlpHouse.

We would therefore like to invite you to an informative meeting at the "Solarexpo" fair in Verona on the 5th of May to give you further details about our offered qualification modules and courses.

TARGET GROUP

AlpHouse project partners, Educational institutions, Government institutions

PROGRAMME

12:00 p.m.	Questions and Informal Discussion
12:30	End

REGISTRATION

I wish to take part in the event at the Solarexpo in Verona on the 5th of May 10:00 am -12:30 am

Name	Surname	Institution
Number of Persons	Institution	

QUESTIONNAIRE

We would like to ask you a few questions in advance about the target groups in your region.

1. Craftsmen in your region: Which kind of pre-qualifications do they have?

2. Qualification modules: Are there already qualification modules or courses for plumbers or installers and, if yes, what kinds of courses?

3. Which professional guilds work on solar energy in your region?

4. Which kind of calculation programmes do they use?

5. A course in Bavaria: Would that be interesting for your craftsmen or would they prefer a course in Italy?

Thank you very much!
We are looking forward to your feedback.
