

General information			
Category	Technology and Energy		
ID	QM 4.1.2		
Title	Education series AlpHouse- Topics of Concrete Structures – 6 Modules Modul2 - Structural analysis, renovation concepts and old materials		
Duration	1 day, 8 hours		
N. participants	8 – 20		
Location	Classroom		
Target group	Architects and Planners		
	Craftsman and SMEs		
	Building Owners		
Characteristics of the Qualification Module			
Aims	In this module the basic approaches in a renovation of an old building are taught. In addition to the assessment of damages or energy inefficiencies and eliminate them as part of a renovation the old and new building materials that are used as part of a restructuring are considered.		
Methodic Approach	<ul style="list-style-type: none"> ▪ Lecture ▪ Group discussion of the content ▪ Processing of practical examples 		
Contents	<ul style="list-style-type: none"> ▪ Creation of building analysis ▪ Assessment of building damage ▪ Thermal insulation and moisture protection ▪ Building materials and customer ▪ Development of rehabilitation concepts 		
Learning outcomes	Overview of the content		
Final Certification	Certificate of attendance		
Conception			
PP Leader	LBH – BauAkademie Lehrbauhof Salzburg
