

General information			
Category	Technology and Energy		
ID	QM 4.1.3		
Title	Education series AlpHouse- Topics of Concrete Structures – 6 Modules Modul3 - Moisture in the building and drainage procedures		
Duration	1 day, 8 hours		
N. participants	8 – 20		
Location	Classroom		
Target group	Architects and Planners		
	Craftsman and SMEs		
	Building Owners		
Characteristics of the Qualification Module			
Aims	In this module the basic knowledge of the causes of damage by moisture are treated. Wall drainage procedures and principles of the ÖNORM B 3355 / Part 1-3 are presented.		
Methodic Approach	<ul style="list-style-type: none"> ▪ Lecture 		
Contents	<ul style="list-style-type: none"> ▪ Building physical fundamentals ▪ Structural analysis and root cause determination ▪ Reclamation methods and applications ▪ Accompanying measures ▪ ÖNORM B 3355 / Part 1-3 		
Learning outcomes	Overview of the content		
Final Certification	Certificate of attendance
